## ABOUT

Curious and enthusiastic, I am passionate about Web Technology and everything in its orbit. I actively seek to learn new technologies and stay up-to-date on industry trends and advancements. Capable of building Rich Prototypes and Applications using HTML5, CSS3 and Javascript(Vanilla/Angular/React), Express, Ajax, JSON, Angular, and Bootstrap.

Hailing from a strong IT background with Bachelor's in Computer Application and working in and around web design, development and testing over 3 years. I am keen on working on projects using cutting edge web technologies. My prior experience as an Angular Dev working on enterprise level projects enabled me to explore the power of Object oriented Javascript(ES6) frameworks and patterns such as directives, dependency injection, modules and routing. I aspire to add value into projects and am always willing to innovate and learn new things which can improve the existing technology. Looking for a company willing to offer me a position as a Frontend Web Developer. In return, I would offer my full commitment, and be a pleasant and friendly addition to your team.

## TECHNICAL SKILLS

- Operating Systems: **Windows , Mac and Linux.**
- Good understanding of Document Object Model(DOM) and SEO/Web standards.
- Strong foundation in Javascript **and ES6, CSS3** preprocessor **Sass, HTML5.**
